

MINNESOTA

2020 HEALTH CARE LEGISLATIVE CANDIDATE GUIDE

Health care remains one of the [most important problems facing America](#)ⁱ. [Voters are concerned about access to and the cost for health care and insurance](#)ⁱⁱ. See page 4 for Minnesota-specific data.

Health Care During the COVID Pandemic

The COVID-19 pandemic has illuminated the need for effective solutions that address both the immediate challenges and the long-term gaps in our health care systems to ensure Minnesotans can access quality health care they can afford. Americans are feeling a **mix of emotions** related to the pandemic, and **those emotions are overwhelmingly negative**.*

Q: Which of the following words best describe your feelings when it comes to things going on in your life today?

Across the board, when asked to rank different concerns, the public is deeply concerned about their **health and financial wellbeing**, describing an interconnection of these parts of their life and broader society.

In addition, the pandemic has illuminated deficiencies of our health care system.

- ★ People feel that the **U.S. was caught unprepared** to handle the pandemic and our losses have been greater than those of other countries.
- ★ People **blame government for the inadequate pandemic response, not health care systems**.

*National survey conducted May 1-3, 2020, carries a confidence interval of 90%, with a margin of error between 2-4%. It included a sample size of 2,156 respondents, with oversamples for African American women, Republican-identified men and women, and Republican-identified high school-educated white men. Health status of respondents was not collected or oversampled. These findings have been compared with findings from our ongoing listening effort which began before the pandemic.

Key Messages for Candidates:

- ❑ **Acknowledge the moment:** “Our country is at a pivotal moment. The pandemic, economic recession, and national discussion on race have created a renewed call for action. They have also magnified the critical problems that exist in our health care system.”
- ❑ **Take an active stance:** “It is long past time to examine our systems and address gaps that have existed for decades. We must find solutions and common ground to build a health care system that serves everyone.”
- ❑ **Commit to prioritize people’s needs:** “I will put people’s health care needs first and I’m already formalizing the ways I gather input and work with community and business leaders to put effective solutions in place.”
- ❑ **Commit to both addressing disparities and finding common ground:** “The health care system, as it’s currently structured, isn’t working for far too many. I will work to address the lack of fairness and shared needs to build a health care system that works for all of us.”

About United States of Care

United States of Care is a nonpartisan nonprofit working to ensure every person in America has access to quality, affordable health care regardless of health status, social need or income. USofCare works with elected officials and other state partners across the country by connecting with our extensive [health care expert network](#) and other state leaders; providing technical policy assistance; and providing strategic communications and political support. Promising State Policies to Respond to People's Health Care Needs

In the wake of COVID, policymakers have a critical opportunity to enact solutions to meet their constituents' short- and long-term health care needs. Shared needs and expectations are emerging in response to the pandemic, including the desire for solutions that:

- **Ensure individuals are able to provide for themselves and their loved ones, especially those worried about the financial impact of the pandemic.**
 - Create consumer assistance programs to help people facing disruptions in coverage navigate their health care options.
 - Protect against high out-of-pocket costs.
 - [Ease coverage enrollment](#)ⁱⁱⁱ for those without insurance through simple sign up within income tax forms.
 - Expand access to telehealth services for people who prefer it to improve access to care.
 - [Extend Medicaid coverage for new moms](#)^{iv} to remove financial barriers to care to support healthier moms and babies.

- **Ensure a reliable health care system that is fully resourced to support essential workers and available when it is needed, both now and after the pandemic.**
 - Ensure safe workplaces for front-line health care workers and essential workers and increase the capacity to maintain a quality health care workforce.
 - Support hospitals and other health care providers, particularly those in [rural](#)^v or distressed areas.
 - Expand mental health services and community workforce to meet increased need.

- **Ensure a health care system that cares for everyone, including people who are vulnerable and those who were already struggling before the pandemic hit.**
 - Adopt an integrated approach to people's overall health by coordinating people's physical health, behavioral health and social service needs.
 - Establish coordinated data collection to quickly address needs and gaps in care, especially in vulnerable communities.

- **Provide accurate information and clear recommendations on the virus and how to stay healthy and safe.**
 - Build and maintain capacity for detailed and [effective testing and surveillance](#)^{vi} of the virus.
 - Resource and implement [contact tracing](#)^{vii} by utilizing existing programs in state health departments, pursuing public-private partnerships, or app-based solutions while also ensuring strong privacy protections.

- [Preparedness Handbook to Plan, Prevent and Prepare for COVID-19 Surges](#)^{ix}.

Minnesota by the Numbers

The pandemic is showing different impacts for people across Minnesota that point to larger challenges individuals and families are grappling.

In Minnesota, a **disproportionate number of those infected**^x (44% on June 8th) are **black, indigenous, and people of color** while making up **20%** of the state's population^{xi}.

Seniors are at greatest risk. As of June 5, 2020 nearly **80%** of people who have died from COVID-19 in Minnesota were residents of long-term care facilities.^{xiv}

Access to health care in rural areas^{xii} has only become more challenging during the pandemic and will likely have **lasting impacts on rural communities.** It is estimated that **one third of Minnesota counties** have fewer than 25 hospital beds^{xiii}, and the greater Minnesota population has higher rates of chronic illnesses and older adults making it more susceptible to COVID-19.

The economic fallout of the pandemic has caused **nearly 27 million Americans to lose their employer-based health insurance.**^{xv} An estimated 12.7 million would be eligible for Medicaid; 8.4 million could qualify for subsidies on exchanges; leaving **5.7 million** who would need to cover the cost of health insurance policies (**COBRA**^{xvi} policies average \$7,188 for a single person to \$20,576 for a family of four) or remain uninsured.

HEALTH COVERAGE:

- Minnesota has been a longtime national leader in expanding coverage and access to health care and, as a result, historically, boasts one of the **lowest rates of uninsured in the nation (4.4% in 2018).**
- Minnesota's **unemployment rate jumped to 9.9% in May**^{xvii} on a seasonally adjusted basis which likely has **severed tens of thousands of Minnesotans from their employer sponsored insurance.**
- The COVID pandemic is drastically impacting insurance coverage for Minnesotans -- 9,482 Minnesotans enrolled in private health insurance plans and more than 13,700 applied for public health insurance programs during **MNsure's special enrollment period** from March 23 to April 21, 2020.^{xviii}

COVID: Data about the virus changes on a daily basis. This is a collection of resources to inform ongoing responses to COVID-19.

- Minnesota's first recorded case of COVID-19 was **March 6, 2020.**^{xix}
- Governor Tim Walz declared a public health emergency March 13, 2020 and **enacted many measures** to control the spread of the virus and provide support to Minnesotans.^{xx}
- Minnesota's **COVID-19 Dashboard**^{xxi} tracks the state's infection and death rates.
- **COVID Exit Strategy**^{xxii} tracks state progress toward a reduction in symptoms and cases, health system readiness, and increased testing.
- The legislature **passed** several relief packages and policies to address the pandemic,^{xxiii} however long-term solutions for the state's recovery are needed.

BUDGET:

- In May 2020, Minnesota's current state budget, which goes through June, 2021 was **projected to incur a \$2.42 billion budget deficit**^{xxiv} due to the pandemic.
